## System Overview

The MarineCommander™ is Icom's marine navigation system, which integrates various marine modules such as a fish finder, marine radar, AIS and VHF transceiver into the multi-function display (MFD).

## Affordable Dual Display Connection Up to Four Displays in a System

The MarineCommander allows you to connect two MFDs simultaneously. All connected modules including chart data, fish finder and marine radar can be shared with two MFDs and provide separate operation. When connecting two MarineCommanders via a data cable, up to 4 displays can be used and C-MAP™ chart data can be shared in the system.

## Daylight Viewable Display

The 12.1-inch size MFD provides 800 × 600 pixels resolution. The 900 cd/m² color LCD with anti-reflecting surface coating glass offers bright, vivid indication in detail – even under direct sunlight.

## C-MAP™ MAX Compatible

The MarineCommander is compatible with the C-MAP™ MAX chart by C-MAP Italy S.r.l. in an SD card format\*. The MarineCommander provides quick and fast responding rendering performance. The C-MAP™ MAX chart provides guardian alarm, route-check, perspective view and port database for your safe and easy navigation.

\* Chart data is not supplied from Icom.

## Marine Radar

The MXR-5000R/T marine radar provides clear target separation. Waypoint and AIS target can be overlaid on the radar screen. The marine radar helps collision avoidance and increases your safety at sea. The radar images can be overlaid on the plotter screen in the same scale and help you to detect dangerous objects.

Radar screen

## Fish Finder

When a fish finder module is connected, the MarineCommander system can have a dual frequency sounder function. Using the 50 kHz/200 kHz dual frequency mode, the MarineCommander enhances the separation and helps in fish detection.
